-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 11, it is unclear as to what "in situ" is referring to. Clarification is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2, 7, 10, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Szabo (#4,191,232). Szabo shows the method of attaching a flexible cord handle comprising: forming at least one aperture 6, passing an end of a cord 11, 11' having an aglet 15 which is shaped at an angle so the aglet can not pass through the aperture. .

***Claim Rejections - 35 USC § 103***

Art Unit: 3721

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Szabo in view of Szabo in view of Gatward (#2,992,768). Szabo does not show a disc or washer as claimed; however, Gatward teaches the concept of using a washer 13 as claimed for reinforcement purposes. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide Szabo with washer means as taught by Gatward for reinforcing purposes.

6. Claims 15-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bogatz (#WO97/48550). Bogatz shows an obstruction member 50 which defines a cord receiving cavity to engage a cord and material that is suitable for bonding the cord to the obstruction member, such as, adhesive or direct molding (top of p. 6). The cord is deformed to be held in place as shown in the figures by the configuration of the obstruction means 50 in figs 3-6.

Bogatz fails to show the obstruction member bonding to an aglet of a cord. However, The examiner notes that expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. See ex parte Thibault, 164 USPQ 666, 667 (Bd App. 1969).

Furthermore, inclusion of material or article worked upon by a structure being claimed does not impart patentability to the claims. In re Young, 75 F.2d 996, 25 USPQ 69

Art Unit: 3721

(CCPA 1935) (as restated in *In re Otto*, 312 F.2d 937, 136 USPQ 458, 459 (CCPA 1963).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arney shows an aglet attached to a cord.

8. Claims 1 and 8 are allowed.
